**Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations)** Luciano Alparone, Bruno Aiazzi, Stefano Baronti, Andrea Garzelli

A synthesis of more than ten years of experience, **Remote Sensing Image Fusion** covers methods specifically designed for remote sensing imagery. The authors supply a comprehensive classification system and rigorous mathematical description of advanced and state-of-the-art methods for pansharpening of multispectral images, fusion of hyperspectral and panchromatic images, and fusion of data from heterogeneous sensors such as optical and synthetic aperture radar (SAR) images and integration of thermal and visible/near-infrared images. They also explore new trends of signal/image processing, such as compressive sensing and sparse signal representations.

The book brings a new perspective to a multidisciplinary research field that is becoming increasingly articulate and comprehensive. It fosters signal/image processing methodologies toward the goal of information extraction, either by humans or by machines, from remotely sensed images. The authors explain how relatively simple processing methods tailored to the specific features of the images may be winning in terms of reliable performance over more complex algorithms based on mathematical theories and models unconstrained from the physical behaviors of the instruments.

Ultimately, the book covers the births and developments of three generations of RS image fusion. Established textbooks are mainly concerned with the earliest generation of methods. This book focuses on second generation methods you can use now and new trends that may become third generation methods. Only the lessons learned with second generation methods will be capable of fostering the excellence among the myriad of methods that are proposed almost every day by the scientific literature.

### **From reader reviews:**

#### **Alexander Macdougall:**

In other case, little persons like to read book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations). You can choose the best book if you'd prefer reading a book. Provided that we know about how is important a book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations). You can add knowledge and of course you can around the world by the book. Absolutely right, since from book you can understand everything! From your country right up until foreign or abroad you will find yourself known. About simple point until wonderful thing you are able to know that. In this era, we can easily open a book or perhaps searching by internet unit. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

#### **Karen Partain:**

This Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) are usually reliable for you who want to certainly be a successful person, why. The reason why of this Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) can be one of several great books you must have will be giving you more than just simple studying food but feed a person with information that probably will shock your previous knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions at e-book and printed types. Beside that this Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) forcing you to have an enormous of experience including rich vocabulary, giving you demo of critical thinking that we understand it useful in your day activity. So , let's have it appreciate reading.

#### **Mary Jones:**

The publication with title Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) contains a lot of information that you can find out it. You can get a lot of advantage after read this book. That book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. This specific book will bring you with new era of the internationalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

#### **Steve Pinson:**

In this era globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The particular book that recommended to you is Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) this e-book consist a lot of the information from the condition of this world now. This book was represented

how do the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book ideal all of you.
