Undergraduate Writing in Psychology: Learning to Tell the Scientific Story R. Eric Landrum

This book takes the reader step-by-step through: crafting research questions or theses; executing library database searches; analyzing, evaluating, and synthesizing literature; drafting specific parts of a paper; and, more. Writing samples, including two full-length student papers in draft, marked-up, and final form, illustrate key concepts such as how to synthesize literature, how revision differs from editing, and how to recognize and avoid plagiarism. Guidance on how to communicate with instructors on a professional level is given, and the book shows examples of checklists and grading rubrics instructors might use. A self-quiz to engage the reader's knowledge of APA style and format is also included, as well as example reference formats and other quick-reference style tools.
