Introduction to Natural Products Chemistry

Introduction to Natural Products Chemistry

Natural products chemistry—the chemistry of metabolite products of plants, animals and microorganisms—is involved in the investigation of biological phenomena ranging from drug mechanisms to gametophytes and receptors and drug metabolism in the human body to protein and enzyme chemistry.

Introduction to Natural Products Chemistry has collected the most important research results of natural product chemistry in China. It overviews the basic principles of isolation, structure, and characteristics of natural products and illustrates current research techniques of structure elucidation with real-life examples of wet chemistry and spectroscopic analyses (UV, IR, MS, and NMR, especially 2d-NMR, HMBC, and HMQC), bioactivity, biosynthesis, and chemical synthesis.

Specifically, this book covers:

- Extraction and isolation of natural products
- Chemistry of fungal products
- Alkaloids, sesquiterpenoids, diterpenes, and saponins
- Amino acids and peptides
- Flavonoids, anthraquinones, coumarins, and lignans
- Marine natural products
- Structural modification of active principles from traditional Chinese medicine
- Chemical synthesis of natural products

Although natural products chemistry has produced enormous results and made great contributions to human health, industry, and agriculture, only a fraction of natural resources have been rigorously studied. Chinese natural products are a gold mine for further exploration with modern technology and methods. This book represents the continuing collaboration between the fields of natural products chemistry, medicine, biology, and agriculture which will continue to discover and implement novel chemical products from natural sources.

From reader reviews:

Donna Gray:

The book Introduction to Natural Products Chemistry gives you the sense of being enjoy for your spare time. You should use to make your capable a lot more increase. Book can to become your best friend when you getting stress or having big problem together with your subject. If you can make reading a book Introduction to Natural Products Chemistry being your habit, you can get a lot more advantages, like add your own personal capable, increase your knowledge about several or all subjects. It is possible to know everything if you like available and read a e-book Introduction to Natural Products Chemistry. Kinds of book are several. It means that, science guide or encyclopedia or others. So , how do you think about this publication?

Richard Benson:

Do you considered one of people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Introduction to Natural Products Chemistry book is readable through you who hate those perfect word style. You will find the data here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to deliver to you. The writer connected with Introduction to Natural Products Chemistry content conveys the thought easily to understand by most people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you still thinking Introduction to Natural Products Chemistry is not loveable to be your top listing reading book?

Anna Cooper:

You can find this Introduction to Natural Products Chemistry by go to the bookstore or Mall. Only viewing or reviewing it could to be your solve difficulty if you get difficulties for the knowledge. Kinds of this guide are various. Not only by means of written or printed and also can you enjoy this book through e-book. In the modern era like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose proper ways for you.

Jack Harbin:

Book is one of source of information. We can add our expertise from it. Not only for students but in addition native or citizen have to have book to know the change information of year to year. As we know those books have many advantages. Beside most of us add our knowledge, may also bring us to around the world. From the book Introduction to Natural Products Chemistry we can have more advantage. Don't someone to be creative people? To get creative person must want to read a book. Merely choose the best book that acceptable with your aim. Don't always be doubt to change your life at this book Introduction to Natural Products Chemistry. You can more attractive than now.
