## **Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems**

Alfredo Macias, Francisco Uribe, Enrique Diaz

The FIRST MEXICAN MEETING ON MATHEMATICAL AND EXPERIMENTAL PHYSICS was held at EL COLEGIO NACIONAL in Mexico City, Mexico, from September 10 to 14, 2001. This event consisted of the LEOPOLDO GARCIA-COLIN SCHERER Medal Lecture, delivered by Prof. Nicholas G. van Kampen, a series of plenary talks by Leopoldo Garcia-Colin, Giinter Nimtz, Luis F. Rodriguez, Ruoon Barrera, and Donald Saari, and of three parallel symposia, namely, Cosmology and Gravitation, Statistical Physics and Beyond, and Hydrodynamics and Dynamical Systems. The response from the Physics community was enthusiastic, with over 200 participants and around 80 speakers, from all over the world: USA, Canada, Mexico, Germany, France, Holland, United Kingdom, Switzerland, Spain, and Hungary. The main aim of the conference is to provide a scenario to Mexican researchers on the topics of Mathematical and Experimental Physics in order to keep them in contact with work going on in other parts of the world and at the same time to motivate and support the young and mid career researchers from our country. To achieve this goal, we decided to the most distinguished experts in the subjects of the invite as lecturers conference and to give the opportunity to young scientist to communicate the results of their work. The plan is to celebrate this international endeavor every three years.

### **From reader reviews:**

#### **James Vera:**

Book is to be different for every grade. Book for children right up until adult are different content. To be sure that book is very important for all of us. The book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems ended up being making you to know about other understanding and of course you can take more information. It is quite advantages for you. The book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems is not only giving you considerably more new information but also for being your friend when you experience bored. You can spend your own spend time to read your e-book. Try to make relationship with the book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems. You never feel lose out for everything should you read some books.

#### **Darrell Mayo:**

Do you considered one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems book is readable through you who hate those perfect word style. You will find the facts here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer of Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different as it. So , do you even now thinking Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems is not loveable to be your top list reading book?

#### **Thomas Baier:**

The experience that you get from Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems is the more deep you rooting the information that hide inside the words the more you get interested in reading it. It doesn't mean that this book is hard to understand but Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems giving you buzz feeling of reading. The copy writer conveys their point in particular way that can be understood simply by anyone who read it because the author of this book is well-known enough. This kind of book also makes your personal vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this specific Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems instantly.

#### **Phillip Martin:**

Playing with family inside a park, coming to see the marine world or hanging out with good friends is thing

that usually you will have done when you have spare time, after that why you don't try factor that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems, you are able to enjoy both. It is fine combination right, you still would like to miss it? What kind of hang-out type is it? Oh seriously its mind hangout fellas. What? Still don't get it, oh come on its named reading friends.
