Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) Alan Wee-Chung Liew
The unique research area of audio-visual speech recognition has attracted much interest in recent years as visual information about lip dynamics has been shown to improve the performance of automatic speech recognition systems, especially in noisy environments.

Visual Speech Recognition: Lip Segmentation and Mapping presents an up-to-date account of research done in the areas of lip segmentation, visual speech recognition, and speaker identification and verification. A useful reference for researchers working in this field, this book contains the latest research results from renowned experts with in-depth discussion on topics such as visual speaker authentication, lip modeling, and systematic evaluation of lip features.

From reader reviews:

Brandon Harmon:

This Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) book is not really ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is usually information inside this book incredible fresh, you will get info which is getting deeper you read a lot of information you will get. This specific Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) without we realize teach the one who reading through it become critical in thinking and analyzing. Don't always be worry Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even mobile phone. This Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) having excellent arrangement in word and also layout, so you will not sense uninterested in reading.

Carolina Jones:

Do you have something that you want such as book? The reserve lovers usually prefer to opt for book like comic, small story and the biggest one is novel. Now, why not hoping Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) that give your entertainment preference will be satisfied through reading this book. Reading routine all over the world can be said as the method for people to know world better then how they react toward the world. It can't be mentioned constantly that reading routine only for the geeky man or woman but for all of you who wants to possibly be success person. So , for all of you who want to start reading as your good habit, you could pick Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) become your personal starter.

Joshua Yoshida:

Is it you who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something totally new? This Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) can be the response, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?

Sharon Baker:

As we know that book is vital thing to add our expertise for everything. By a guide we can know everything you want. A book is a pair of written, printed, illustrated or even blank sheet. Every year has been exactly added. This book Visual Speech Recognition: Lip Segmentation and Mapping (Premier Reference Source) was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading some sort of book. If you know how big benefit from a book, you can experience enjoy to read a book. In the modern era like now, many ways to get

book that you just wanted.
