Sometimes, truly original and creative, even world-changing ideas appeared.

Following key currents in management thought from the origins of civilization to the present day, the book begins in the ancient world, when people were wrestling with the problems of organization and leadership. It continues through the Middle Ages, east and west, as people pondered on how to manage risk and think strategically, and on the role of business in society. It shows how the Industrial Revolution led to the emergence of scientific management, and how political and social events of the twentieth century shaped management thinking right up to the present day.
