Construction managers must understand all aspects of a wide range of mechanical, electrical, and plumbing systems. Mechanical and Electrical Systems for Construction Managers provides an overview of these systems aimed at general contractors, construction managers, supervisors, and those desiring to enter the construction industry.

This edition includes the latest information on building automation systems, including control devices, signals, and logic. Each chapter includes review questions that test for comprehension of the content covered. This textbook can be used as part of a comprehensive construction management program.
