Economics as a Political Muse: Philosophical Reflections on the Relevance of Economics for Ecological Policy (The International Library of Environmental, Agricultural and Food Ethics) M.K. Deblonde

This book looks afresh, from a philosophical perspective, on the role economic theory plays in present-day ecological policy. It starts from fundamental questions concerning the nature of the problem of sustainability, of politics, and of economic science. It confronts the results of this investigation with the theoretical work of two prominent present-day economists. This book is written at a high academic level. It will be of interest to environmentalists, environmental economists, and for policy people charged with ecological problems.
