# Neuro-Ophthalmology (What Do I Do Now)

Matthew J. Thurtell, Robert L. Tomsak, Robert B. Daroff

**Neuro-Ophthalmology (What Do I Do Now)** Matthew J. Thurtell, Robert L. Tomsak, Robert B. Daroff  
Neuro-ophthalmology is a field of medicine that touches on every subspecialty in neurology, but has an undeserved reputation as a branch of knowledge that is difficult to learn and practice. Many neurologists and ophthalmologists do not receive sufficient exposure to neuro-ophthalmology during their residencies, and are uncomfortable diagnosing and treating patients with neuro-ophthalmic problems.

Authored by neuro-ophthalmologists whose careers span three generations in the field, *Neuro-Ophthalmology* helps clinicians evaluate and manage patients with neuro-ophthalmic problems. This "curb-side consult" approach is divided into five sections: afferent (visual) disorders; efferent (eye movement) disorders; eyelid disorders; pupil disorders; and combination syndromes. Based on the most current scholarly evidence and filled with practical advice, *Neuro-Ophthalmology* provides the answers to "what do I do now?"
