Noninvasive Molecular Markers in Gynecologic Cancers

Noninvasive Molecular Markers in Gynecologic Cancers

Early detection is critical for any given cancer. With the advent of the latest omics technologies, molecular markers in combination with conventional diagnostic and screening methods are emerging as next-generation early diagnostic and prognostic strategies that can allow early-stage diagnosis, resulting in more effective treatment and patient care and, in turn, an increased rate of survival. A ready-made resource, **Noninvasive Molecular Markers in Gynecologic Cancers** not only provides information on noninvasive molecular diagnostic biomarkers, it includes coverage of the epidemiology, clinical features, conventional diagnosis, treatment, and prognosis for these cancers.

With contributions from leading international experts, the book presents a compact but comprehensive overview of gynecologic cancer. Each of the five main gynecologic cancers—ovarian, cervical, uterine, vaginal, and vulvar—have unique signs and symptoms, risk factors, and molecular profile, and therefore requires different prevention strategies. This book describes the different features of each gynecologic cancer in separate chapters covering general information, epidemiology, clinical features, and biomarkers. The book also covers breast cancer and, although rare, fallopian tube cancer, to make it a complete resource.

In cancer treatment, non-invasive diagnosis can avoid complications of biopsy and other unfavorable impacts on patients' health. DNA, methylation, SNPs, miRNA, mRNA, protein, autoantibodies, metabolite, and omics-based markers from remote media such as blood, plasma, and urine are emerging as noninvasive molecular markers with high specificity and sensitivity towards many cancers. This book classifies the available molecular tumor markers according to their principal characteristics and relative methodologies. It covers markers that not only provide early detection and better treatment options, but are emerging as next-generation personalized diagnostics and targets or therapeutics for personalized cancer treatment.

From reader reviews:

Raymond Bailey:

This Noninvasive Molecular Markers in Gynecologic Cancers book is not really ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is usually information inside this book incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This Noninvasive Molecular Markers in Gynecologic Cancers without we comprehend teach the one who studying it become critical in contemplating and analyzing. Don't become worry Noninvasive Molecular Markers in Gynecologic Cancers can bring once you are and not make your handbag space or bookshelves' come to be full because you can have it in the lovely laptop even telephone. This Noninvasive Molecular Markers in Gynecologic Cancers having excellent arrangement in word and also layout, so you will not experience uninterested in reading.

Lydia Baum:

Now a day folks who Living in the era exactly where everything reachable by match the internet and the resources in it can be true or not need people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Examining a book can help individuals out of this uncertainty Information specifically this Noninvasive Molecular Markers in Gynecologic Cancers book as this book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you may already know.

James Sweeney:

Often the book Noninvasive Molecular Markers in Gynecologic Cancers will bring one to the new experience of reading a book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very suitable to you. The book Noninvasive Molecular Markers in Gynecologic Cancers is much recommended to you to study. You can also get the e-book through the official web site, so you can quickly to read the book.

Anna Baron:

People live in this new day of lifestyle always aim to and must have the extra time or they will get great deal of stress from both day to day life and work. So , when we ask do people have extra time, we will say absolutely indeed. People is human not really a huge robot. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading guides. It can be your alternative with spending your spare time, often the book you have read is actually Noninvasive Molecular Markers in Gynecologic Cancers.
