Works as Entities for Information Retrieval (Cataloging & Classification Quarterly)

Richard Smiraglia

Works as Entities for Information Retrieval (Cataloging & Classification Quarterly) Richard Smiraglia
Examine domain-specific research about works and the problems inherent in their storage and retrieval!

This book addresses the issue of focusing on known-*item* identification and retrieval vs. collocation and retrieval of *works* in the construction of catalogs. *Works as Entities for Information Retrieval* reports significant research on the role of works as key entities for information retrieval, focusing on the importance of works in information-need and the importance of recognizing and using the work entity in the construction of bibliographic databases, Internet search engines, etc.

This single source brings together librarians and scholars from around the world—the United States, Denmark, Canada, Australia, and India—to examine the most recent research on works and on systems to facilitate their retrieval. They share their expertise on essential aspects of works cataloging, including:

- record clustering for works of fiction
- ways to define and categorize video works
- conceptualizing the bibliographic record as text
- the semiotics of scientific works
- performed works and AACR2R
- ways to catalog scientific models
- cataloging digitized rare books and electronic texts
- cataloging cartographic materials as works—with three fascinating case studies
- and more!
