Design in Nature: Learning from Trees Claus Mattheck

The chicken bone you nibbled yesterday and threw away was a high-tech product! Not only that: it was a superlative light-weight design, functionally adapted to its mechanical requirements. No engineer in the world has, as yet, been able to copy this structural member, which is excellently optimized in its external shape and its internal architecture as regards minimum weight and maximum strength. The tree stem on which you recently carved your initials has also, by life-long care for its body, steadily improved its internal and external structure and adapted optimally to new loads. In the course of its biomechanical self-optimization it will heal up the notch you cut as speedily as possible, in order to repair even the smallest weak point, which might otherwise cost it its life in the next storm. This book is dedicated to the understanding of this biomechanical optimization of shape. It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self-optimization (adaptive growth) and to simulate it by computer. The method newly developed for this purpose was called CAO (Computer-Aided Optimization). With this method, it is possible to predict the growth of trees, bones and other biological structures from the tiger's claw to the sea urchin's skeleton.

From reader reviews:

Andrew Fox:

The book Design in Nature: Learning from Trees can give more knowledge and information about everything you want. Why must we leave a good thing like a book Design in Nature: Learning from Trees? Several of you have a different opinion about guide. But one aim that will book can give many information for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or details that you take for that, it is possible to give for each other; you may share all of these. Book Design in Nature: Learning from Trees has simple shape nevertheless, you know: it has great and large function for you. You can seem the enormous world by available and read a guide. So it is very wonderful.

Catherine Gabel:

Information is provisions for individuals to get better life, information these days can get by anyone with everywhere. The information can be a know-how or any news even a huge concern. What people must be consider whenever those information which is inside the former life are hard to be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you find the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Design in Nature: Learning from Trees as your daily resource information.

Stephanie Sellers:

Spent a free a chance to be fun activity to try and do! A lot of people spent their spare time with their family, or their very own friends. Usually they carrying out activity like watching television, about to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Could possibly be reading a book may be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to attempt look for book, may be the guide untitled Design in Nature: Learning from Trees can be great book to read. May be it can be best activity to you.

Michael Aldrich:

Does one one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you just dont know the inside because don't ascertain book by its protect may doesn't work is difficult job because you are frightened that the inside maybe not because fantastic as in the outside search likes. Maybe you answer might be Design in Nature: Learning from Trees why because the amazing cover that make you consider regarding the content will not disappoint anyone. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly make suggestions to pick up this book.
