Plasma Surface Modification and Plasma Polymerization Norihiro Inagaki

In current materials R&D, high priority is given to surface modification techniques to achieve improved surface properties for specific applications requirements. Plasma treatment and polymerization are important technologies for this purpose.

This book provides a basic and thorough presentation of this subject. This is probably the first book to cover plasma treatment and polymerization for the purpose of surface modification. Chemistry, processes and applications are detailed. More than 150 figures include numerous schematics which illustrate the chemistry and processes. More than 100 tables and graphics provide useful reference data in convenient form.
