**Soft Computing for Image and Multimedia Data Processing** Siddhartha Bhattacharyya, Ujjwal Maulik

Proper analysis of image and multimedia data requires efficient extraction and segmentation techniques. Among the many computational intelligence approaches, the soft computing paradigm is best equipped with several tools and techniques that incorporate intelligent concepts and principles. This book is dedicated to object extraction, image segmentation, and edge detection using soft computing techniques with extensive real-life application to image and multimedia data.

The authors start with a comprehensive tutorial on the basics of brain structure and learning, and then the key soft computing techniques, including evolutionary computation, neural networks, fuzzy sets and fuzzy logic, and rough sets. They then present seven chapters that detail the application of representative techniques to complex image processing tasks such as image recognition, lighting control, target tracking, object extraction, and edge detection. These chapters follow a structured approach with detailed explanations of the problems, solutions, results, and conclusions.

This is both a standalone textbook for graduates in computer science, electrical engineering, system science, and information technology, and a reference for researchers and engineers engaged with pattern recognition, image processing, and soft computing.

### **From reader reviews:**

#### **Tod Espitia:**

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a move, shopping, or went to typically the Mall. How about open or perhaps read a book called Soft Computing for Image and Multimedia Data Processing? Maybe it is for being best activity for you. You already know beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have some other opinion?

#### **Janette Collins:**

This Soft Computing for Image and Multimedia Data Processing book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this e-book incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This particular Soft Computing for Image and Multimedia Data Processing without we know teach the one who reading it become critical in thinking and analyzing. Don't end up being worry Soft Computing for Image and Multimedia Data Processing can bring if you are and not make your bag space or bookshelves' turn into full because you can have it inside your lovely laptop even cell phone. This Soft Computing for Image and Multimedia Data Processing having very good arrangement in word and also layout, so you will not feel uninterested in reading.

#### **Judith Robinson:**

Here thing why this particular Soft Computing for Image and Multimedia Data Processing are different and reputable to be yours. First of all studying a book is good however it depends in the content than it which is the content is as delicious as food or not. Soft Computing for Image and Multimedia Data Processing giving you information deeper and in different ways, you can find any e-book out there but there is no book that similar with Soft Computing for Image and Multimedia Data Processing. It gives you thrill examining journey, its open up your own eyes about the thing that will happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in park, café, or even in your way home by train. If you are having difficulties in bringing the printed book maybe the form of Soft Computing for Image and Multimedia Data Processing in e-book can be your alternate.

#### **Daniel Gordon:**

In this time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended for you is Soft Computing for Image and Multimedia Data Processing this publication consist

a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. This is why this book suited all of you.
