The International Vehicle Aerodynamics Conference IMechE

Aerodynamics has never been more central to the development of cars, commercial vehicles, motorbikes, trains and human powered vehicles, driven by the need for efficiency: reducing carbon dioxide emissions, reducing fuel consumption, increasing range and alleviating problems associated with traffic congestion. Reducing vehicle weight makes it more challenging to ensure that they are stable and handle well over a wide range of environmental conditions. Lighter structures are also more vulnerable to aerodynamically induced vibration. Alongside this, customers demand an environment that is quiet, comfortable and maintains their vision of the world around them in all weathers. These aims must be met by designing vehicles that engage customers emotionally, promoting the brand values of manufacturers and operators. This can only be done by collaboration between designers and aerodynamicists.

- Examine the latest developments in vehicle aerodynamic development
- Explore opportunities to network and share experiences around different areas
- Focus on future challenges and the engineering knowledge and technology required to resolve them
- Discuss other areas of development including handling and stability, tyre aerodynamics and modelling, aeroacoustics and fluid structure interaction

From reader reviews:

David Dozier:

What do you about book? It is not important to you? Or just adding material when you really need something to explain what yours problem? How about your time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. The doctor has to answer that question because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this particular The International Vehicle Aerodynamics Conference to read.

Virginia Higgins:

This book untitled The International Vehicle Aerodynamics Conference to be one of several books that will best seller in this year, this is because when you read this reserve you can get a lot of benefit into it. You will easily to buy this kind of book in the book shop or you can order it through online. The publisher in this book sells the e-book too.
