Adrenocortical Carcinoma: Basic Science and Clinical Concepts

Adrenocortical Carcinoma: Basic Science and Clinical Concepts

We anticipate the book to be a definitive text on the subject that explores all aspects of the study of adrenal cancer and the treatment of patients with the disease. Chapters will cover epidemiology, pathogenesis, genetics, cancer stem cells, historic and emerging therapies, mouse models of adrenal cancer, new developments in tumor profiling, worldwide collaborative groups and tumor registries together with resources for the practitioner and community of adrenal cancer scientists.

We do not wish this book to compete with the other larger books in the Endocrine and Endocrine Surgery literature. In addition, it is not expected to cover benign adrenal diseases that have been covered in detail in other venues. We envision this book to be a very specialized and exhaustive text on basic, translational and clinical aspects of adrenal cancer.
